

STRATEGIC HEALTHCARE CONSTRUCTION REPORT

Volume 1 Issue 4

July 10, 2020

QUALITY. INTEGRITY. INNOVATION.

Our goal is to facilitate a streamlined process in the healthcare construction & inspection industry. We pursue and align these goals with our Clients, Designers, OSHPD and Contractors through experience, expertise and innovation.

Highlights

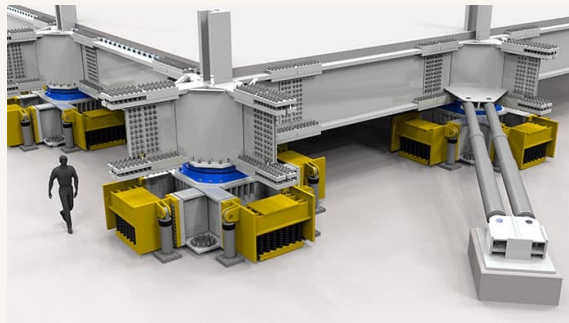

BEAT CORONAVIRUS

Resilience through these unprecedented times makes you stronger. The Loma Linda construction team has exhibited just that. Together they have navigated through these dynamic circumstances by providing multiple resources and measures to enhance working conditions for more than a 700 worker count on the project. Health and safety initiatives were immediately put in place. Leadership from each team coordinated daily conference calls to support each other and showcase a strong commitment to everyone involved in the project. Constant communication and updates were shared collectively to help mitigate the spread

of the virus.

If you're interested in learning more about base isolation with viscous damping from our last week's report, please visit Taylor Devices Inc.

Southern California Hospital Culver City is moving forward with their Voluntary Seismic Improvement (VSI) Senate Bill 1953 with SBS providing Inspector of Record Services. This project consists of shear strengthening selected concrete columns by adding fiber wrap to mitigate deflection incompatibility and “Short Captive Column” deficiencies. Additional concrete shear walls will also be strengthened using TYFO fiber wrap. Structural upgrades of this magnitude are very invasive to the facility but necessary to keep the building safe for their patients, visitors and staff. This project will keep the facility in compliance with a Seismic Performance Category (SPC) 2 that will allow operation until 2030. Please visit the OSHPD link below to learn more about California Seismic Compliance and view a map with information of SPC ratings for all California hospitals.

OSHPD SC and SPC Ratings

Upcoming Events

How important is training to your team? In an industry that is as fluid as hospital construction in California, it is very important for us to ensure that we have a cohesive team that is all following the same path. SBS President, Tyler Bashlor, will be providing a team training this Tuesday, July 14, 2020 to align our product software that we utilize for all of our project tracking and TIO sign off. We have incorporated many specific aspects of this software to make our inspection process more efficient and useful for our clients and OSHPD to see project progress and inspection acceptance. To learn more about this software, please visit their website.
